

Lesson Plan Template Teaching and Learning and Clinical Practice Courses

PRELIMINARY INFORMATION
TEACHER CANDIDATE: Jaspreet Missan DATE: 11-15-2024 GRADE: 2nd Grade # STUDENTS: 25
UNIT/TOPIC: Literacy LESSON # 31
LESSON NAME: Red Word and Reading Comprehension

Lesson Overview:

The students go over Red Words every week in order for them to keep learning/recognizing words that are commonly used, but they don't follow the general rule that is traditionally followed when it comes to sounding out words because the word is spelled differently than how it sounds. The students start off with this activity at the beginning of the day because it is a short activity that gets them ready for the rest of the day. After the activity, the students go into reading groups where they get practice on activating prior knowledge and working on reading comprehension. The students also are expected to answer *who*, *what*, *when*, *where*, *why*, and *how* questions about the book they are reading. These questions will be prepared by me ahead of time, and there will be two questions about what they read last, and two about what they read during the group. The students are also expected to recognize Red Words we have already gone over and are expected to read them correctly in their reading. In order for students to become better at reading comprehension, they are expected to read with fluency. This means students are practicing to read with accuracy, prosody, and can read at a rate that is appropriate for the text they are reading. In this case, the students are reading chapter books, so they are expected to read every part in order to catch all the details. Once students begin to read at an appropriate rate, they understand the story better and can better answer the questions about the book. When the students know I will be asking them questions after their reading, they tend to read more carefully. Going over Red Words also helps with fluency because once students learn how to spell out and read high frequency words, they are able to read them effectively in their books.

STANDARDS, OBJECTIVES, ACADEMIC LANGUAGE
CONTENT STANDARDS (Math) (ELA) (Social Studies) (Science): List the academic content standards (include both number and text) (e.g., Common Core State Standards, Core Content Connectors, NGSS standards). If only a portion of a standard is addressed, then only list the part or parts that are relevant.

CCSS.ELA.2.RL.1 Ask and answer such questions as <i>who</i>, <i>what</i>, <i>when</i>, <i>where</i>, <i>why</i>, and <i>how</i> to demonstrate understanding of key details in a text. CCSS.ELA.2.RF.3f Recognize and read grade-appropriate irregularly spelled words.
CALIFORNIA ENGLISH LANGUAGE DEVELOPMENT (ELD) STANDARDS (Interacting, How English Works, Foundational Literacy): List the standard(s) (include both number and text) that are most relevant to the lesson.
CCSS.ELD.2.P.1.B5.Ex Listening actively to spoken English in a range of social and academic contexts.
CONTENT LEARNING OBJECTIVE(S): Based on the content standards, write one or two content learning objectives that state what students should know and/or be able to do as a result of this lesson. Objectives MUST be: specific, measurable, and realistic.
Students will be able to correctly spell the red word of the week and be able to use it in a sentence. Students will be able to answer questions about the text they are reading in order to demonstrate reading comprehension.
STUDENT-FRIENDLY LEARNING GOAL(S):
I will be able to spell the red word of the week and use it in a sentence. I will be able to answer questions about the book I am reading.
LANGUAGE OBJECTIVES: Based on the ELD standards, write one or two language objectives that state how students' English language development will be supported through this lesson. Consider how you might include objectives that meet the needs of students at different proficiency levels (emerging, expanding, bridging, lifelong learning)
Students will be able to comprehend stories from books at their respective reading levels.

CSUSM School of Education | Multiple Subject

STANDARDS, OBJECTIVES, ACADEMIC LANGUAGE
ACADEMIC LANGUAGE: Identify the language demands of the lesson. Detail the level and complexity of the texts being used, as well as the key vocabulary students must understand in order to participate effectively in this lesson.
Students should understand '<i>who</i>, <i>what</i>, <i>when</i>, <i>where</i>, <i>why</i>, and <i>how</i>' questions in order to effectively and accurately answer the questions about the text.

STUDENT DATA (Current Performance)	
Prior Knowledge and/or Pre-lesson assessments (i.e.: questionnaires, concept inventories, anticipation guide, open ended questions, graphic organizer, entrance tickets)	I will activate prior knowledge with the students by talking to each group about what has happened in the books they are reading so far. I will do this before telling them what pages to read so they are able to piece the story together better.
Performance Level	Before Lesson Current Performance (Student Names & % of all students)
Exceeds Standards	
Meets Standards	
Approaching Standards	
STUDENT DATA: How will you use this data to inform instructional approach (whole group, small group, rotations, individualized)? Which co-teaching approach supports and aligns with the data for this lesson? How might this data influence the lesson plan to support all learners Universal Design for Learning (UDL) principles?	
Specific UDL supports & extensions planned	
Planned Assessments Formal and Informal (i.e.: Turn & Talk, Think-Write-Pair Share, Thumbometer, graphic organizer, Summary, ABC Chart, Sorting Activities, Concept Maps)	- We will be filling out a graphic organizer together as a class to help students learn the red word of the day. - Listening to the students read aloud one by one in order to assess their fluency. - Think-pair share will be used once the students are in their reading rotations and will be asked to answer some of the questions I ask about the section of the chapter books they are on. (TPE 7.9)

STRATEGIES AND LEARNING TASKS

LAUNCH/HOOK/ENGAGEMENT(Opening):

How will you start the lesson to connect with what students have already learned and know (activate background knowledge)?

How will you integrate what you know about your student's academic knowledge, social development, funds of knowledge, and cultural backgrounds to engage the students from the start?

I will start the lesson off by asking the students to guess the red word of the day by asking them to fill in the blank on a sentence that I provide for them.

Sentence: "I _____ the *Mario Movie* at the movie theatres."

(Hopefully the students will say "saw.")

LESSON SEQUENCE(Middle): Specify the sequence of activities that will scaffold your students' learning toward the objectives.

What will students be doing? Think specifically about what questions you will ask, in what activities students will engage, how you will promote discussion, and how you will facilitate students' use of key academic language.

As you write this section, be sure to design your instruction to support *all* learners in your classroom (i.e., use universal design principles: engagement, representation, action & expression; accommodations and modifications)

What formative assessments will you use for each activity to inform lesson effectiveness?

Teaching Strategies/Learning Tasks/Activities	Formative Assessment(s)
- I will begin by going over the student friendly learning goal. - I will ask the students to sit up nice and tall and to be confident about learning the word together. - I will pass out the 'red words' worksheet to the students and then start by telling them the red word of the day, which is "saw." - Then, I will ask the students to write the word "saw" the way they think it should be written based on how it sounds. - I will explain how the 'aw' in "saw" makes the short 'o' sound and how 'a' and 'w' together make the short 'o' sound. - Then, the students will write the part of the word that is spelled like it sounds with a green crayon and the part that is not spelled how it sounds with a red crayon. (TPE 7.5) - Then, on the line below, the students will write the word 'saw' correctly with their red crayon. This will be done with a bumpy board underneath their paper so once the students remove the bumpy board from underneath, they can trace over the word two times	- Informal Assessment:

with their finger. This will help students who benefit from sensory learning. - Next, the students will write the word with their pencil from memory and use the word in a sentence they have to come up with. - After this, the CT and I will check their sentences and give them a star on their paper/ask them to fix any mistakes we see. - After we finish the Red Words worksheet, we will split off into reading groups and I will display their groups and their expectations per rotation on the screen. - The first group will be with me at the teacher table where the students will individually read a few pages of the chapter book assigned to this group. - I will listen to each of them read individually in order to assess them on their fluency and comprehension skills. - Once I have them answer the questions (verbally) I will ask them to guess what they think will happen next in the books they are reading.	checking their sentences to make sure their spelling and punctuation is correct. - Informal Assessment: checking their reading (fluency) skills by asking questions about the text as they read.
CLOSURE(Closing): How will you bring closure to the lesson? - I will close the lesson off by asking the students to write a question about the next part of the book and also answering the question. Once they are done, they will place the sticky notes that have their question and answer in their books where we stopped reading. When we keep reading the next day, the students will get to see if they answered their question accurately, and if not, they have to find the correct answer. This allows students to not only answer <i>who</i>, <i>what</i>, <i>when</i>, <i>where</i>, <i>why</i>, and <i>how</i> questions, but they also practice creating their own using their knowledge of the story they are reading.

What questions and/or prompts might you use to support students in articulating/sharing their learning? How will you preview what will come next for the students in regard to the subject matter?
I will ask the students questions such as "What do you predict will happen next?" and "Why do you think [respected character] is feeling this way?" I will also give students the opportunity to share their thoughts with each other. Before we begin reading, I will also ask the students to activate prior knowledge by discussing what has happened in the book so far. (TPE 7.6)
RESOURCES AND MATERIALS: What materials will you need for this lesson? What materials will students need?

Red words worksheet, red crayon, green crayon, pencil, bumpy boards, chapter books that are pre assigned to each group.

If appropriate, the lesson may include a rubric for the formative assessment. If so, the chart below may be used. The objective(s) listed at the left, followed by brief descriptions of the criteria for each rubric score.

Rubric & Success Criteria for Formal Formative Assessment

3 = Exemplary/Accomplished 2 = Proficient/Achieving 1 = Developing/Emerging

Lesson Objective(s)	3 Exceeding	2 Meeting	1 Approaching
