

PE Lesson Plan Template

Name: *Jaspreet Missan*

Use this template to design a movement-based lesson for your chosen grade level. Your lesson should align with a PE standard and reflect what you've learned about creating inclusive, engaging, and safe physical education experiences. Think about how this activity supports student learning and how it could build over time. Have fun with it, be creative and strive to make movement fun for your students!

Grade Level: 5th grade
<u>PE Standard(s):</u> Standard 1.19: Design and perform a routine to music that involves manipulation of an object. Standard 2.5: Design a routine to music, changing speed and direction while manipulating an object. Standard 5.5: Contribute ideas and listen to the ideas of others in cooperative problem-solving activities.
Learning Objective: Students will design and perform a ball-handling routine to music in small groups, by using changes in speed and direction while manipulating a ball, and demonstrate cooperative problem-solving by contributing and listening to group ideas.
Student Friendly Learning Goal: "We will work together in small groups to create a fun ball-handling dance routine to music. This will be done by changing how fast we move and where we go, while sharing and listening to everyone's ideas!"
Materials Needed: ● Basketballs (one per student) ● A speaker and a song with a strong beat. ● Cones to define group spaces ● Timer for warm-up and activity segments
Warm-Up Activity: (5 minutes) ● Activity: Students will perform a dynamic warm-up to prepare for movement and object manipulation. ○ Jog in place for 30 seconds to increase heart rate. ○ Perform arm circles (forward and backward) to warm up shoulders for ball handling. ○ Do a gentle torso twist stretch to improve flexibility for directional changes. ○ Clap to the beat of the chosen song to practice rhythm awareness.

Main Activity:
(20–25 minutes)

- **Step 1 (5 minutes):** The teacher plays the song and demonstrates basic ball-handling moves (e.g., bounce, spin, toss-and-catch) while moving to the beat. The teacher will highlight changes in speed (e.g., slow bounces vs. quick dribbles) and direction (e.g., moving side to side). Explain the concept of designing a routine.
- **Step 2 (10 minutes):** Students are divided into groups of 4–6. Each group will design a 1-minute ball-handling routine to the music, incorporating at least two speed changes (e.g., slow to fast) and two direction changes (e.g., forward to sideways). Students will share ideas and listen to each other.
- **Step 3 (10 minutes):** Groups perform their routines for another group while maintaining focus on moving to the beat and manipulating the ball accurately. The teacher will go around to provide feedback on rhythm and form.

Accommodations/Modifications for Inclusion:

- **Diverse Abilities:** Students with limited mobility can perform seated ball-handling moves (e.g., rolling the ball side to side) while still following the music's rhythm.
- **Skill Levels:** Pairing of students with varying skill levels in each group will encourage peer support. Others can perform simpler moves (e.g., bouncing in place) for beginners and more complex moves (e.g., spinning the ball) for advanced students.
- **Cultural Inclusion:** Encourage groups to incorporate movements inspired by diverse dance styles (e.g., hip-hop, folk dance) to reflect heritage (Standard 5.8).
- **Language Support:** Provide visual cues (e.g., a chart of ball-handling moves) for English language learners to follow along.

Safety Considerations:

- Ensure the activity space is clear of obstacles and groups are spaced out (marked by cones) to avoid collisions.
- Remind students to handle balls safely (e.g., no throwing at others) and to stop immediately when the teacher signals.
- Encourage students to act responsibly and avoid reckless behavior, such as pushing others.
- Check that all students are wearing appropriate footwear to prevent slipping.

Assessment (How will you know students met the objective?):

- **Observation:** The teacher observes each group's performance to ensure they incorporate speed and direction changes while manipulating the ball to the music.
- **Group Reflection:** After performing, each group discusses one thing they did well and one thing they could improve, demonstrating cooperative interaction.
- **Checklist:** A simple checklist to confirm each student: (1) manipulated the ball rhythmically, (2) changed speed/direction, and (3) contributed/listened to ideas.

Extension Ideas (How could this lesson continue over multiple days?):

- **Day 2:** Students can refine their routines by adding more complex ball-handling skills (e.g., dribbling while moving) and perform for the whole class.
- **Day 3:** Introduce a new object (e.g., a soccer ball or hoop) for manipulation and create a new routine, comparing how different objects affect movement.
- **Ongoing:** Students set a personal goal to practice one ball-handling move at home and track progress, sharing updates in the next class.
