

Lesson Plan Template Teaching and Learning and Clinical Practice Courses

PRELIMINARY INFORMATION
TEACHER CANDIDATE: Jaspreet Missan DATE: 03-13-2025 GRADE: 5th Grade # STUDENTS: 31
UNIT/TOPIC: Science LESSON # 1 of 3
LESSON NAME: Planet Research

STANDARDS, OBJECTIVES, ACADEMIC LANGUAGE
CONTENT STANDARDS (Math) (ELA) (Social Studies) (Science): List the academic content standards (include both number and text) (e.g., Common Core State Standards, Core Content Connectors, NGSS standards). If only a portion of a standard is addressed, then only list the part or parts that are relevant.
● CCSS.ELA-LITERACY.W.5.7: Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic. ● CCSS.ELA-LITERACY.SL.5.4: Report on a topic or text, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes. ● NGSS 5-ESS1-1: Support an argument that the apparent brightness of the sun and stars is due to their relative distances from Earth.
CALIFORNIA ENGLISH LANGUAGE DEVELOPMENT (ELD) STANDARDS (Interacting, How English Works, Foundational Literacy): List the standard(s) (include both number and text) that are most relevant to the lesson.
CCSS.ELD.2.P.1.B5.Ex Listening actively to spoken English in a range of social and academic contexts.
CONTENT LEARNING OBJECTIVE(S): Based on the content standards, write one or two content learning objectives that state what students should know and/or be able to do as a result of this lesson. Objectives MUST be: specific, measurable, and realistic.

Students will be able to correctly cite sources by identifying the facts in articles.

STUDENT-FRIENDLY LEARNING GOAL(S):

I will be able to identify the facts in an article.

I will be able to cite my sources and write an informational sentence.

I will be able to write a citation.

LANGUAGE OBJECTIVES: Based on the ELD standards, write **one** or **two** language objectives that state how students' English language development will be supported through this lesson. Consider how you might include objectives that meet the needs of students at different proficiency levels (emerging, expanding, bridging, lifelong learning)

CSUSM School of Education | Multiple Subject

STANDARDS, OBJECTIVES, ACADEMIC LANGUAGE

ACADEMIC LANGUAGE: Identify the language demands of the lesson. Detail the level and complexity of the texts being used, as well as the key vocabulary students must understand in order to participate effectively in this lesson.

- Facts
- Resources
- Research
- Atmosphere
- Gas planet
- Rock planet
- Citation
- Credibility

STUDENT DATA (Current Performance)

Prior Knowledge
and/or Pre-lesson
assessments (i.e.:

questionnaires, concept
inventories, anticipation guide,

- Students will talk amongst each other to remind themselves of the 3 vocabulary words "citation, resource, and fact"
- Turn and talk, activating prior knowledge of vocabulary

open ended questions, graphic organizer, entrance tickets)	
Performance Level	Before Lesson <i>Current Performance</i> (Student Names & % of all students)
Exceeds Standards	
Meets Standards	
Approaching Standards	
STUDENT DATA: How will you use this data to inform instructional approach (whole group, small group, rotations, individualized)? Which co-teaching approach supports and aligns with the data for this lesson? How might this data influence the lesson plan to support all learners Universal Design for Learning (UDL) principles?	
Specific UDL supports & extensions planned	
Planned Assessments Formal and Informal (i.e.: Turn & Talk, Think-Write-Pair Share, Thumbometer, graphic organizer, Summary, ABC Chart, Sorting Activities, Concept Maps)	- Turn and Talk: when recalling prior knowledge. - Vocabulary notes out for guidance/reminders - Highlighting activity (as a class) - Highlighting activity (in groups) - Research sentence (submit at the end of the lesson as a summative assessment and exit ticket)

CSUSM School of Education | Multiple Subject

STRATEGIES AND LEARNING TASKS
LAUNCH/HOOK/ENGAGEMENT(Opening): How will you start the lesson to connect with what students have already learned and know (activate background knowledge)? How will you integrate what you know about your student's academic knowledge, social development, funds of knowledge, and cultural backgrounds to engage the students from the start?

Students will be asked to think about different ways in which they receive information about certain things. I will ask them to think “How do you know that the information you are receiving is accurate/true?” “How do you know where to go to get the most reliable information?”

LESSON SEQUENCE(Middle): Specify the sequence of activities that will scaffold your students’ learning toward the objectives.

What will students be doing? Think specifically about what questions you will ask, in what activities students will engage, how you will promote discussion, and how you will facilitate students’ use of key academic language.

As you write this section, be sure to design your instruction to support *all* learners in your classroom (i.e., use universal design principles: engagement, representation, action & expression; accommodations and modifications)

What formative assessments will you use for each activity to inform lesson effectiveness?

Teaching Strategies/Learning Tasks/Activities	Formative Assessment(s)
- After activating our prior knowledge, I will introduce the research lesson to the students. - Then, as a class, we will look over a research article together in which I will ask the students to help me highlight the facts in one color, and the resource that proves it’s reliable in another color. - Then, I will model how to write a sentence with citations for the whole class. - After this, I will model what a citation entails/looks like. - Then I will hand out 1 more article to each table group, in which they will have to do the same thing in pairs or as a table group. - Once the students complete this activity, I will explain how they have to use the article I provided in order to write about it in the form of a short research sentence to help them take information from the text and accurately describe it, and also provide the source that backs it up. - Expectations: The sentence must include a fact from the article they annotated and a resource to back it up and prove its credibility.	- What are sources? - What is the significance of a citation? (I will ask the students this question before starting the lesson) - Listening to student answers as they help highlight the article. - As students do this, I will be going around to see how they are doing, and the things they are discussing. - I will provide students with sentence starters such as: “According to...,” “As described by...,” “As stated by...”

CLOSURE(Closing): How will you bring closure to the lesson?

- Formative assessment/exit ticket: Write a sentence using the article that was provided by the teacher to talk about a fact and the resource that supports it.

CSUSM School of Education | Multiple Subject

What questions and/or prompts might you use to support **students in articulating/sharing their learning?**

How will you preview what will come next for the students in regard to the subject matter?

- Allowing students to share their thoughts throughout the lesson, whether it's during whole group discussions or small groups.
- Letting students work together in order to encourage thinking aloud and deeper discussions.

RESOURCES AND MATERIALS: What materials will you need for this lesson? What materials will students need?

- Writing journal for vocabulary notes (activating prior knowledge)
- Article for students to annotate
- 2 different colored markers, highlighters, or colored pencils
- Half sheet of paper to write their sentence (exit ticket)

If appropriate, the lesson may include a rubric for the formative assessment. If so, the chart below may be used. The objective(s) listed at the left, followed by brief descriptions of the criteria for each rubric score.

Rubric & Success Criteria for Formal Formative Assessment

3 = Exemplary/Accomplished 2 = Proficient/Achieving 1 = Developing/Emerging

Lesson Objective(s)	3 Exceeding	2 Meeting	1 Approaching

CSUSM School of Education | Multiple Subject

LESSON EFFECTIVENESS	
Post-Instruction Reflection with MT	
Post Lesson Assessments (i.e.: questionnaires, concept map, open ended questions, T/F questions, sorting activities, graphic organizer, exit tickets)	
Performance Level	After Lesson Achievement (Student Names & % of all students)
Exceeds Standards	
Meets Standards	
Approaching Standards	
STUDENT DATA: What percentage of the students moved up a level? What percentage of the students moved down a level? What percentage of the students remained the same? How might his data inform future lessons?	

LESSON REFLECTION (TC self-reflects after watching video of own teaching)	
Reflecting on your instruction: How did the instructional approach (teaching) align with student performance/lesson outcomes (learning)?	
What went well? What should remain? What might require enhancement?	What stalled learning? What might require adjustment? What might require removal?
