

Lesson Plan Template
Teaching and Learning and Clinical Practice Courses

PRELIMINARY INFORMATION
TEACHER CANDIDATE: Jaspreet Missan DATE: 03-13-2025 GRADE: 5th Grade # STUDENTS: 31
UNIT/TOPIC: Social Studies LESSON # 1 of 1
LESSON NAME: Taxation Simulation

STANDARDS, OBJECTIVES, ACADEMIC LANGUAGE
CONTENT STANDARDS (Math) (ELA) (Social Studies) (Science): List the academic content standards (include both number and text) (e.g., Common Core State Standards, Core Content Connectors, NGSS standards). If only a portion of a standard is addressed, then only list the part or parts that are relevant.
CCSS.SS.5.5.1.5 Understand how political, religious, and economic ideas and interests brought about the Revolution (e.g., resistance to imperial policy, the Stamp Act, the Townshend Acts, taxes on tea, Coercive Acts).
CALIFORNIA ENGLISH LANGUAGE DEVELOPMENT (ELD) STANDARDS (Interacting, How English Works, Foundational Literacy): List the standard(s) (include both number and text) that are most relevant to the lesson.
CCSS.ELD.2.P.1.B5.Ex Listening actively to spoken English in a range of social and academic contexts.
CONTENT LEARNING OBJECTIVE(S): Based on the content standards, write one or two content learning objectives that state what students should know and/or be able to do as a result of this lesson. Objectives MUST be: specific, measurable, and realistic.
Students will be able to understand the relationship between the colonists and parliament during the time of taxation and how taxation led to the colonists seeking independence.
STUDENT-FRIENDLY LEARNING GOAL(S):
I will be able to understand how the colonists felt the unfairness when being taxed by parliament. I will be able to understand how parliament went about taxing the colonists.

LANGUAGE OBJECTIVES: Based on the ELD standards, write **one** or **two** language objectives that state how students' English language development will be supported through this lesson. Consider how you might include objectives that meet the needs of students at different proficiency levels (emerging, expanding, bridging, lifelong learning)

CSUSM School of Education | Multiple Subject

STANDARDS, OBJECTIVES, ACADEMIC LANGUAGE
ACADEMIC LANGUAGE: Identify the language demands of the lesson. Detail the level and complexity of the texts being used, as well as the key vocabulary students must understand in order to participate effectively in this lesson. - Sugar Tax - Stamp Tax - Quartering Act - Townshend Acts - Tea Act - Parliament - Colonist - Representation

STUDENT DATA (Current Performance)	
Prior Knowledge and/or Pre-lesson assessments (i.e.: questionnaires, concept inventories, anticipation guide, open ended questions, graphic organizer, entrance tickets)	- Students will talk amongst each other to remind themselves of the 3 vocabulary words "citation, resource, and fact" - Turn and talk, activating prior knowledge of vocabulary
Performance Level	Before Lesson Current Performance (Student Names & % of all students)

Exceeds Standards	
Meets Standards	
Approaching Standards	
STUDENT DATA: How will you use this data to inform instructional approach (whole group, small group, rotations, individualized)? Which co-teaching approach supports and aligns with the data for this lesson? How might this data influence the lesson plan to support all learners Universal Design for Learning (UDL) principles?	
Specific UDL supports & extensions planned	
Planned Assessments Formal and Informal (i.e.: Turn & Talk, Think-Write-Pair Share, Thumbometer, graphic organizer, Summary, ABC Chart, Sorting Activities, Concept Maps)	- Role-playing - Full class Summary - Turn & Talk

STRATEGIES AND LEARNING TASKS
LAUNCH/HOOK/ENGAGEMENT(Opening): How will you start the lesson to connect with what students have already learned and know (activate background knowledge)? How will you integrate what you know about your student's academic knowledge, social development, funds of knowledge, and cultural backgrounds to engage the students from the start?
The launch of this lesson will happen once the tax collector (one of the students) lets the colonists know (another group of students), of the monarch and British parliament's plan to tax the colonists. Students will also receive roll cards which will state their roles, location, job, and tea preference for the lesson. Introduce the concept and what they will be doing.

LESSON SEQUENCE(Middle): Specify the sequence of activities that will scaffold your students' learning toward the objectives.

What will students be doing? Think specifically about what questions you will ask, in what activities students will engage, how you will promote discussion, and how you will facilitate students' use of key academic language.

As you write this section, be sure to design your instruction to support *all* learners in your classroom (i.e., use universal design principles: engagement, representation, action & expression; accommodations and modifications)

What formative assessments will you use for each activity to inform lesson effectiveness?

Teaching Strategies/Learning Tasks/Activities	Formative Assessment(s)
- The teacher will play the monarch (Ms. Missan) - Case 1 (Sugar tax): The tax collector/British soldiers will go to the Middle and Southern colonies and take 1 piece of candy from each colonist. Then, they will take 2 pieces of candy from each of the New England colonists. - Case 2 (Stamp Act): The tax collectors will announce that 2 pieces of candy will be taken away from each colonist with a notebook on their desk and 1 from anyone wearing short sleeve shirts. Soldiers (group of students) will be told to monitor colonists who are trying to hide their notebooks or deny wearing short sleeves. Those colonists will be taxed an additional piece of candy if they're caught. - Case 3 (Quartering Act): Tax collectors will be told to take 1 piece of candy from each person in the Middle and Southern Colonies and 2 pieces from each person in the New England colony. - Case 4 (Townshend Act): Tax collectors will take 1 piece of candy from anyone with glasses and an additional 1 piece of candy from anyone with a water bottle or beverage on their desk. British soldiers will take an additional 1 piece of candy if they notice the colonists hide their glasses or water bottles. - Case 5 (Tea Act): Tax collectors will take 1 piece of candy away from anyone who prefers tea from the British East India Company and 2 pieces away from anyone who prefers tea from either the Dutch or French East India Company.	- Regulating colonists' reaction to absurd taxes will assess their understanding of the tension between the colonists and parliament. - Observing conversations between soldiers, tax collectors, and colonists.

CLOSURE(Closing): How will you bring closure to the lesson?

- Class discussion:
- Formative assessment/exit ticket: Write a small reflection of the lesson.
- What did you observe?
- How did the lesson bring the situation between the colonists and parliament to life? Give specific examples.

CSUSM School of Education | Multiple Subject

What questions and/or prompts might you use to support **students in articulating/sharing their learning**?

How will you preview what will come next for the students in regard to the subject matter?

- The students will be prompted to think about how the colonists may have reacted and will be encouraged to think about how they can implement those behaviors for this lesson.
- The monarch will talk to the tax collectors about why they are taking certain actions and relay those reasons to the colonists that question them.

RESOURCES AND MATERIALS: What materials will you need for this lesson? What materials will students need?

- Role cards
- 230 pieces of candy
- 31 plastic cups
- Clear jar for monarch to collect taxes in

If appropriate, the lesson may include a rubric for the formative assessment. If so, the chart below may be used. The objective(s) listed at the left, followed by brief descriptions of the criteria for each rubric score.

Rubric & Success Criteria for Formal Formative Assessment

3 = Exemplary/Accomplished 2 = Proficient/Achieving 1 = Developing/Emerging

Lesson Objective(s)	3 Exceeding	2 Meeting	1 Approaching
Relationships between British parliament and colonists with an example	Students are able to recognize the relationship between the British and the colonists and provide a specific example.	Students were able to recognize the relationship between the British and the colonists.	Student has not identified the relationship between the British and the colonists yet.
Make at least 2 connections to history	Students made 2 or more connections to history from the lesson.	Students made 1-2 connections to history from the lesson.	Student has made no connections between the lesson and history yet.

Make 1 connection to how you felt in the lesson vs. how the people would have felt back in the 1760s	Students made 2 or more connections to how the person they played may have felt back in the 1760s.	Students made a connection to how the person they played may have felt back in the 1760s.	Students have not yet made any connections to how each of the roles felt back in the 1760s.

LESSON EFFECTIVENESS	
Post-Instruction Reflection with MT	
Post Lesson Assessments (i.e.: questionnaires, concept map, open ended questions, T/F questions, sorting activities, graphic organizer, exit tickets)	
Performance Level	After Lesson Achievement (Student Names & % of all students)
Exceeds Standards	
Meets Standards	
Approaching Standards	
STUDENT DATA: What percentage of the students moved up a level? What percentage of the students moved down a level? What percentage of the students remained the same? How might his data inform future lessons?	

LESSON REFLECTION (TC self-reflects after watching video of own teaching)

Reflecting on your instruction: How did the instructional approach (teaching) align with student performance/lesson outcomes (learning)?

What went well? What should remain? What might require enhancement?	What stalled learning? What might require adjustment? What might require removal?
- Students understood the purpose of the lesson as it went on and began to make connections with prompts from the teacher - Students were able to make connections between the simulation and history. - Be more clear about the requirements for the exit ticket.	- The students weren't understanding that the candy was being taken from them in the beginning - I had to tell the tax collectors how to collect the candy in order for it to be more obvious to the colonists that something is being taken from them. - I went back and clarified to the tax collectors to let the colonists know why they're being taxed. - It was noisy in the beginning, I could have made the instructions more clear and specific.
