To Whom It May Concern:

I am writing this letter to highly recommend Jaspreet Missan for employment as an elementary teacher. I was her first semester supervisor and mentor for her student teaching assignment at Discovery Elementary School in San Marcos, CA in a 2nd grade classroom. As her supervisor and mentor, I had the pleasure of witnessing her development and growth, which was in addition to her natural abilities and gifts as an educator.

Jaspreet took on the role of a student teacher very naturally and soon made herself an integral part of the 2nd grade classroom. Her mentor teacher utilized her in many ways to enhance the daily plans, which supported the co-teaching model utilized in this school. She participated in daily activities, along with, planning and instructing small groups in the areas of reading, writing, and math, and working one-on-one with students with diverse needs to promote learning in a full-inclusion setting. She did all of these activities with such ease and made it look like she had been teaching many years.

In addition to Jaspreet's work ethic and commitment to excellence, she possesses a natural ability to collaborate effectively with others. She demonstrates a positive attitude and enthusiasm that creates a welcoming and inclusive atmosphere in any setting.

In summary, I recommend Jaspreet Missan without reservation. She would be an excellent addition to any school staff, making valuable contributions to her peers and any students that are fortunate enough to be placed in her classroom. Please feel free to contact me if you require any further information.

Sincerely,

Jan Patterson
